

INTRODUCING THE # FENCE

FULLY
MODULAR
DESIGN

Manufactured entirely out of aluminium, A-Fence will revolutionise the fencing market. Requiring very few components to achieve an effective and robust installation, the fire-safe A-Rated aluminium design will be catching the eyes of architects, developers and, of course, homeowners across the country.

Components include:

- 3 sizes of fence slats; 50mm, 100mm, 150mm
- 2 or 4-way post to allow for changes in direction at corners
- Inner Post to be fixed to ground
- Inner Post Cover to hide the fixings from view
- Spacer Cover Strips
- Post Top Cap
- Retaining Clip to seal panels in place, preventing them from flying out or losing shape
- Fixings will be supplied

WATER
RESISTANT

Aluminium is a non-combustible material, eliminating the risk of damage from fire.

A-Fence achieves **A2-s1, d0** fire rating, proving its non-combustibility. The shift towards using non-combustible materials in recent years across the construction industry has underlined the importance of the choices we make in regard to the materials we use to prevent any costly future remediation. Among the drawbacks of wood in

fence panels is its tendency to absorb moisture in rainfall. This causes them to expand and contract, gradually forcing their support panels to shift out of place and the panels to warp.

Aluminium, of course, is non-porous so does not absorb water, eliminating the fear of support panels shifting, warping or being dislodged.

Colour & Design

Available finishes include RAL 7016 and 9005 all in a sleek powder-coat, providing a range of aesthetically pleasing options to suit any property.

RAL 7016

Jet Black
RAL 9005

Configurations

The aluminium fencing panels are available in 3 sizes; 50mm, 100, and 150mm.

With the option of having them spaced out through the use of our spacer cover strips for an open design, or for a private feel you can opt to have them fitted closed together similar to traditional fencing.
