

# MANUAL PLEATED UNDER BLINDS

## Discreet Shading Designed for Simplicity Verandas and Canopies

The Manual Pleated Under Blinds system delivers an elegant, retrofittable shading solution specifically engineered for all systems up to a 4m projection.

These discreet blinds are manually operated via a extension rod, providing comfortable shading without compromising the clean lines of the structure. Suitable for both domestic and commercial applications.

- ✓ Verandas
- ✓ Garden Canopies
- ✓ Carports
- ✓ Glass Rooms

# Benefits

- **Sunlight Reduction:** Minimises glare and solar heat for added comfort
- **Temperature Control:** Helps regulate conditions beneath the canopy
- **Quick Installation:** Simple to retrofit with all required parts supplied
- **Discreet Fit:** Neatly positioned between glazing bars for a clean look
- **Low Maintenance:** Smooth manual operation and long-lasting durability

# Features

- Made-to-measure pleated blinds for each roof panel
- Compatible with the roof bars on all systems
- Manual extension rod operation for intuitive control
- Mounting clips for rapid installation
- Made from pleated honeycomb fabrics that trap air for thermal insulation
- Designed for retrofitting without altering existing structures
